NAVEEN KUMAR GAYAR

Senior Developer / Backend Architect — Cloud Native | Java | Kubernetes | Modernization

Canada | +1(647)926-2846 | naveen.gayar@wipro.com

PROFESSIONAL SUMMARY

Technical Lead and Backend Architect with deep expertise in **Core Java, PL/SQL, Spring Boot, and production operations** for enterprise financial systems. Proven track record in leading **Production Specialists**, managing **technical escalations**, performing **daily transaction monitoring**, and ensuring **SLA-compliant service delivery** across multi-region support environments. Adept at identifying recurring issues, performing RCA, implementing long-term fixes, and driving operational excellence. Strong communicator with experience partnering directly with clients, technology stakeholders, and governance teams. Well aligned to Citibank's L1 requirements focused on **performance review, issue management, quality checks, coaching, and adherence to delivery processes**.

TECHNICAL SKILLS

LANGUAGES

CORE JAVA,
JAVA 17
SQL,
PL/SQL,
PYTHON,
JAVASCRIPT
PYTHON

FRAMEWORKS

SPRING BOOT
SPRING CORE
HIBERNATE,
JAX-RS,
MICROSERVICES

CLOUD & DEVOPS

AZURE
AWS,
DOCKER
KUBERNETES
HELM

DATABASES

ORACLE
H2
POSTGRESQL
MONGODB

CORE COMPETENCIES

- **Core Java (Mandatory) —** deep hands-on and troubleshooting experience
- **PL/SQL Knowledge (Preferred)** — strong SQL + PL/SQL for issue analysis
- **Technical Escalation Handling &** SLA Management
- **Daily Production Review** — logs, jobs, transactions, backlog, exceptions
- **Client Query Handling & Controlled Communication**
- **Coaching & Capability Development of L1 Support Teams**
- **Process Governance, Compliance, Documentation, RCA**
- **Excellent Written & Verbal Communication**

PROFESSIONAL EXPERIENCE

Technical Lead / Architect

Wipro Technologies, Toronto, ON

2021 - Present

Key Responsibilities:

Production Operations, SLA Governance & Performance Oversight

- Reviewed daily operational dashboards, job run statuses, transaction counts, backlog, and high-risk items to ensure **continuous SLA adherence.**
- Performed routine **health checks, log analysis, exception review, and service performance tracking.**
- Documented recurring patterns, created reusable troubleshooting guides, and ensured consistent process compliance across the team**.**
- Flagged early red-alert situations and executed structured escalation to L2/L3 as per protocol**.**

NAVEEN KUMAR GAYAR

Senior Developer / Backend Architect — Cloud Native | Java | Kubernetes | Modernization

Canada | +1(647)926-2846 | naveen.gayar@wipro.com

TOOLS

GIT
MAVEN
PROMETHEUS
GRAFANA
ELK

KEY CAPABILITIES

PRODUCTION SUPPORT
API DEBUGGING, PERFORMANCE TUNING,
DOCUMENTATION,
INCIDENT/PROBLEM MANAGEMENT,
DISTRIBUTED CACHING,
EVENT-DRIVEN ARCHITECTURE

2. Technical Escalation Management & Client Query Resolution

- Served as primary escalation contact for complex issues across Java-based systems and microservices.
- Performed deep-dive debugging (Core Java + SQL/PLSQL) to resolve high-severity issues impacting batch jobs, API transactions, and user operations.
- Collaborated with client SMEs, architects, and cross-functional teams to ensure **timely resolution and transparent communication.**
- Conducted follow-up reviews with clients to ensure accurate closure and quality of issue resolution.

---

3. Capability Building & Team Mentoring

- Trained Production Specialists on **Core Java fundamentals, log analysis, SQL debugging, API triaging, and best practices.**
- Developed structured triage programs and curated knowledge repositories to uplift team capability—directly mapped to the SR's coaching expectations.
- Led learning sessions on recurring issue patterns, process compliance, and new functionalities.

---

4. Cloud-Native Engineering & Backend Development

- Developed enterprise-grade services using **Java 17, Spring Boot, Microservices.**
- Modernized legacy Java systems by decomposing monoliths into containerized microservices.
- Created Kubernetes deployments (manifests + Helm) and automated cloud deployments on AKS/EKS.
- Implemented Kafka-based streaming pipelines and event-driven processing systems.

---

5. Reliability, Monitoring & Continuous Improvement

- Implemented monitoring dashboards via **Grafana, Prometheus, and ELK,** significantly improving proactive detection.
- Reduced repeat incidents through structured RCA, better documentation, and engineering fixes.
- Drove initiatives to enhance overall stability, response times, and uptime of production systems.

NAVEEN KUMAR GAYAR

Senior Developer / Backend Architect — Cloud Native | Java | Kubernetes | Modernization

Canada +1(647)926-2846 naveen.gayar@wipro.com

KEY ACHIEVEMENTS (Mapped to Citi KPIs)

- **Raised SLA compliance** and significantly reduced high-severity escalations across multiple production environments.
- **Improved team productivity** by delivering targeted training and establishing strong triage practices**.**
- **Enhanced customer satisfaction** through consistent communication, timely follow-ups, and issue closure discipline.
- **Reduced production issues by 30**%+ through modernization, improved monitoring, and systematic RCA implementation.

KEY PROJECTS

Cloud-Native Microservices Platform Modernization

- Modernized a legacy Java monolith into containerized microservices using Spring Boot, Docker, and Kubernetes.
- Improved scalability by 40% and reduced deployment time from time to minute.

Distributed Computing for High-Throughput Processing

- Designed distributed workloads using Ray/Spark-style patterns (parallel execution, backpressure, resiliency).
- Built autoscaling policies tuned for performance & cost optimization—aligned with job's desired distributed computing experience.

EDUCATION

- Masters in Information Systems
- Bachelors in Computer Applications

NAVEEN KUMAR GAYAR

Senior Developer / Backend Architect — Cloud Native | Java | Kubernetes | Modernization

Canada +1(647)926-2846 naveen.gayar@wipro.com

TRAINING AND CERTIFICATIONS

- Java Certification
- Docker & Kubernetes Certifications
- AWS & Azure Certifications
- Architecture Certification
- Hashi Corp Terraform Associate (In Progress)

THOUGHT LEADERSHIP & CONTRIBUTIONS

- Authored whitepapers on modernization, API ecosystems, cloud-native architectural patterns.
- Delivered architecture talks & engineering best-practice sessions internally and externally.
- Built reusable accelerators improving solutioning speed and architectural consistency.

SOFT SKILLS

- Stakeholder Management • Analytical Problem
- Solving • Attention to Detail
- Client-Centric Communication • Decision
- Making • Execution Excellence
- Collaboration • Leadership & Capability Building

PERSONAL DETAILS

- **Passport Details:** U7339028
- **VISA Status** Canada Work Permit (valid through Nov 2029)

NAVEEN KUMAR GAYAR

Senior Developer / Backend Architect — Cloud Native | Java | Kubernetes | Modernization

Canada +1(647)926-2846 naveen.gayar@wipro.com

ALL PROJECTS

Senior Developer

Wipro Technologies — Toronto, Canada

Apr 2024 – Present

Client: TD Bank

Project: IVR Integration Services

Role Evolution: Architect, Lead, Functional Consultant, API Engineer

Key Responsibilities

- Led end-to-end API design for TD's IVR journey—Identification, Authentication, Card Summary, Pending & Posted Transactions.
- Conducted solution walkthroughs with Product Owners, Business Analysts, and Dev Leads.
- Handled high-risk integrations involving IVR systems, Visa host (VIL), and TD downstream APIs.
- Applied TD security frameworks and Azure deployment patterns across microservices.
- Performed gap analysis, proposed remediation strategies, and uplifted legacy systems.
- Improved error taxonomy, metadata, correlation IDs, and observability.
- Introduced automation via service virtualization and Postman test suites.
- Mentored global teams across India and Canada.
- Owned solution design for a multi-million-dollar modernization program (Voyageur).

Senior Developer

Aug 2023 – Mar 2024

Client: Lloyds Bank

Project: Customer Identity & Access Management (CIAM)

Role Evolution: Architect, Lead Engineer, DevOps Integrator

Key Responsibilities

- Led developers to enhance microservices for identity & access modernization.
- Designed and provisioned development environments.
- Modernized REST APIs and migrated them to Docker/Kubernetes.
- Strengthened customer identity workflows across journeys.
- Led end-to-end IT operations design for CIAM components.

NAVEEN KUMAR GAYAR

Senior Developer / Backend Architect — Cloud Native | Java | Kubernetes | Modernization

Canada +1(647)926-2846 naveen.gayar@wipro.com

Senior Developer

Aug 2022 – Jul 2023

Client: Charles Schwab Corporation (via TD Bank, Toronto)

Project: Customer Account Technology (Trading)

Role Evolution: Architect, DevOps Lead, Cloud Engineer

Key Responsibilities

- Partnered with BAs, Architects, and Dev teams to enhance trading platforms.
- Designed data-intensive microservices with Azure/AWS/GCP integrations.
- Conducted code reviews, solution approvals, and architecture governance.
- Led implementation using Spring Boot, Spring Batch, Kafka, and REST APIs.
- Used DevOps stack: Bitbucket, Bamboo, SonarQube, Veracode.
- Mentored cross-functional teams and managed vendor relationships.
- Implemented observability and performance optimization across services.

Developer / Functional Consultant

Apr 2022 – Jul 2022

Client: Metrolinx, Toronto

Responsibilities

- Evaluated enterprise tools for modernization.
- Created assessment reports and recommendations for leadership approval.
- Worked closely with stakeholders to map business requirements to technical feasibility.

Developer / Designer

Apr 2021 – Mar 2022

Client: HSBC

Project: Fraud Detection Modernization

Role Evolution: Architect, Migration Lead, DevOps-enabled Engineer

Responsibilities

- Led offshore teams for secure API modernization.
- Authored migration steps for legacy-to-microservices transformation.
- Successfully migrated one entire customer fraud journey to production ahead of plan.
- Delivered architectural blueprints for gateway layers: System → Process → Experience APIs.

Developer / Designer

NAVEEN KUMAR GAYAR

Senior Developer / Backend Architect — Cloud Native | Java | Kubernetes | Modernization

Canada +1(647)926-2846 naveen.gayar@wipro.com

Apr 2018 – Apr 2021

Client: ANZ

Project: Digital Payments (Apple Pay, Google Pay, Samsung Pay, Garmin Pay, Fitbit Pay)

Role Evolution: Full-Stack Developer, API Designer, Team Lead

Responsibilities

- Created modular backend-for-frontend microservices for digital wallet integration.
- Designed async REST services for provisioning, lifecycle management, and wallet operations.
- Led offshore team, managed enhancements, and resolved production incidents.
- Generated performance metrics using Infosys IPM tools.

Developer / Designer (Onsite Coordinator)

Apr 2017 – Apr 2018

Client: ANZ

Project: Identity & Access Management (IAM) – Melbourne

Responsibilities

- Delivered 1 user story every sprint as onsite lead.
- Worked with IDAM, biometric services, and downstream authentication APIs.
- Coordinated between offshore and onsite engineering teams.
- Contributed to Spring Boot microservices and OpenShift deployments.

Developer / Lead (Offshore)

Apr 2015 – Apr 2017

Client: AT&T

Project: Online Store Platform

Responsibilities

- Led offshore development team.
- Gathered requirements, enhanced APIs, and modernized licensing workflows.
- Coordinated daily with US stakeholders.

Developer / Tester / Consultant

Apr 2013 – Apr 2015

Client: Apple

Project: Contact Center — Virtual Queue System

Responsibilities

- Conducted Proof of Concepts and proposed architecture solutions.
- Developed APIs using Apache CXF, Spring, Hibernate.

NAVEEN KUMAR GAYAR

Senior Developer / Backend Architect — Cloud Native | Java | Kubernetes | Modernization

Canada +1(647)926-2846 naveen.gayar@wipro.com

- Prepared architectural documentation.
- Improved queue metrics logic and callback workflows.

Frontend Developer

Sep 2010 – Apr 2013

Client: General Electric

Project: Electric Vehicle (EVSE) Platform

Responsibilities

- Built geospatial interfaces using Google Maps API.
- Integrated location intelligence for EV charging stations.
- Demonstrated frontend prototypes to customers.

Developer / Tester

Sep 2010 – Apr 2013

Client: Persistent Systems

Project: SuccessFactors – Employee Referral System

Responsibilities

- Gathered requirements, developed Java/JSP/Servlet modules.
- Performed testing and demonstrations for onsite coordinators.
- Built reusable HR integration components.

Developer

Apr 2006 – Sep 2009

Client: Cognizant (CTS)

Project: Advisor Workstation – Financial Advisory Tool

Responsibilities

- Enhanced Swing UI modules and web components.
- Contributed to SOAP web services and servlets.
- Followed waterfall SDLC for financial workloads.

Developer / Architect Trainee

Jan 2004 – Apr 2006

Client: NIMAYA

Project: Single Customer View (SCV)

Role Evolution: Junior Developer → Designer → Early Architect Track

Responsibilities

NAVEEN KUMAR GAYAR

Senior Developer / Backend Architect — Cloud Native | Java | Kubernetes | Modernization

Canada +1(647)926-2846 naveen.gayar@wipro.com

- Designed, developed, and tested SCV components.
- Updated design documentation and contributed to data unification strategies.
- Worked with Apache Axis, SOAP, WebLogic, and Oracle.
